

Oakland Veterinary Referral Services
has long been considered a leading
center of specialty
veterinary care in the Midwest.

When your pet needs the expertise of a specialist,
OVRS is the world-class choice for your pet's care.
Our veterinary specialists are supported by a highly
trained staff of licensed veterinary technicians
and other caring professionals.

Our expert professionals, advanced technology
and wide range of treatment options all contribute
to excellent veterinary care.

However, we realize the ultimate satisfaction of
our clients depends on the excellence of our
client service. We are proud to have
earned the confidence, trust and respect of
thousands of local veterinarians and pet owners
alike by offering exceptional care and outstanding
services in a nurturing environment.

An OVRS *Commitment*

**The health of our patients is our top priority.
We will always work in close partnership with
the referring veterinarian
to promote the best course of care.**

Veterinary **EYE CARE**

**At Oakland Veterinary Referral Services,
we offer a full array of veterinary
eye care services.**

The health of your pet is our top priority. Our eye care specialist will meet your pet, discuss their full medical history, review all medications, perform a thorough eye exam, make a diagnosis and present a treatment plan if needed.

An animal's eyes
have the *power* to speak
a great language.
— Martin Buber

PET EYE PROBLEMS

Ocular health is an important part of your pet's overall quality of life; left untreated, eye diseases can lead to blindness and discomfort. Signs that your pet may be having problems with their eyes include:

Squinting

Red Eyes

Eye Discharge

Visual Trouble

(Such as Bumping Into Objects)

Unwillingness to Jump or Climb

Difficulty Navigating in the Dark

**A Different Appearance
to Your Pet's Eye**

An Overall Behavior Change

Diseases affecting the tissues around the eye including the eyelids, conjunctiva and the bones of the eye socket are also common among our four-legged furry companions.

Dogs and cats, just like people, can develop corneal ulcers, glaucoma, cataracts, and retinal detachment, all of which need treatment to ensure comfort and vision.

Animals also have eyelid diseases that require treatment including congenital malformations, entropion (inward rolling of the eyelids), ectropion (outward rolling of the eyelids), eyelid tumors and traumatic injuries.

OUR EXPERTISE

At OVRS, we pride ourselves on working alongside your primary care veterinarian to treat your pet's eye disease.

This involves referral of your pet for advanced ocular examination, diagnostics and/or surgical procedures.

We have the ability to perform a wide array of diagnostic and therapeutic eye care procedures for your pet, including:

Electroretinography (ERG)

Ultrasonography

Cataract Surgery
(phacoemulsification)

Lens Luxation Surgery

Intraocular Lens Implantation

Diode Laser Surgery

Cosmetic Eye Surgery

Neoplasia Diagnosis & Treatment Planning

Computed Tomography (CT)

Corneal Ulcer Management

Corneal Injury Repair

Glaucoma Treatment

Therapeutic Bandage Contact Lenses

Prolapsed Gland of the Third Eyelid Repair

Eyelid Reconstruction & Mass Removal

Eyelid Filler Injections for Entropion

Eye Removal with Intraorbital Prosthesis

Intrascleral Prosthesis
